- **Every batch of oil is NAFSA certified to guarantee the oils meet the highest standards.**
- **Only practitioner grade MCT (Medium Chain Triglycerides) / coconut carrier oils are used.**
- **Nothing but the best for your fur-kids.**

Vondi's & CBD

When dealing with our furry friends it is imperative that there are no trace elements of THC of chemical solvents. It is also important to administer a low dose pure CBD and administer it frequently. We believe that our CBD is priced very well for the highest quality oil.

What is CBD?

CBD (cannabidiol) oil is a substance extracted from hemp and known for its therapeutic properties. It's also non-psychoactive, meaning it doesn't contain any THC. It's long been used to help with everything from calming anxiety to easing pain to lessening the intensity and frequency of seizures.

CBD Oil for Dogs: How it Works

Cannabidiol (CBD) is a substance that is found in a cannabis or hemp plant. Unlike THC that creates a 'buzz', CBD is NOT a psychoactive stimulus, but rather provides your dog with a calming feeling and pain-relieving sensations without harming them with potential intoxicating effects. You may be interested to know that both humans and dogs have the same endogenous cannabinoid system. CBD acts by targeting these receptors located in the brain, organs, central nervous system, and immune cells that stimulate relaxing effects.

What Are the Benefits of Cannabis Oil for Dogs?

Cannabis oil can be used to treat seizures, nausea, stress, anxiety, arthritis, back pain, symptoms of cancer, and gastrointestinal issues, among other health conditions in dogs.

Treats Seizures and Epilepsy

Many dog owners turn to CBD when their canine suffers from seizures and epilepsy. High levels of CBD can manage your pet's seizures. Over time, it has been known to reduce the frequency of them, and in some cases get rid of the seizures altogether.

Arthritis

Even dogs can't escape arthritis, but CBD can help with that. Arthritis is the inflammation of joints that cause aching, pain, and other degenerative illnesses. As CBD is a pain reliever, it targets these aching joints and gives your dog relief. Not only that, but it soothes the chronic inflammation that prevents your pet from healing properly.

Boost Appetite

When a dog loses their appetite, it can be hard to know the reason why. Majority of the time, however, they lose it due to nausea. As a human, we won't eat when we feel like that unless we take something to alleviate the digestive issue and receive pain relief. CBD can do this for your pet.

Reduces Anxiety

If you have ever suffered from anxiety, then you know that it is awful, and it would be the same for your dog too. Many dogs suffer from anxiety and have been known to be depressed and extremely anxious in certain situations, such as when their owner leaves. This can result in destructive behaviours such as chewing objects, urinating, pacing, and more. CBD helps because it is a relaxing stimulant that calms your pet.

Prevents and Fights Cancer

Unfortunately, dogs can get cancer too, and when they do they have symptoms of nausea, loss of appetite, and chronic pain. CBD allows your pet to feel comfortable during those difficult times and helps to reduce the side effects that cancer can have on your dog.

How to Add Cannabis Oil to Your Dog's Diet

If you think that cannabis oil sounds like the right treatment for your dog, then there are different methods for adding CBD to your dog's diet. These include:

- Vondis Dog treats
- Vondis Cannabis oil

Whilst the oil are great, you may find that the dog treats work better for your dog as they are more prone to want to take the treat.

Are Cannabinoids Good for My Pet?

CBD products are absolutely safe for your dog as they are non-toxic and offers a relaxing stimulant and pain-relief effects. Cannabinoids come from the hemp oil (or hemp seed oil) and leave out most if not all of the THC making it a safe supplement for your pet.

Is CBD Hemp Oil Bad for my Dog?

No, it's not bad for your pet as it is all natural ingredients. Medical cannabis such as cannabidiol oil is extracted from marijuana plants but doesn't mean it automatically contains THC.

How Do I Know if my Product is Organic?

If your CBD oil for dogs product isn't organic, it will contain substances such as pesticides, fungicides, and/or solvents.

Will it Give my Dog a 'Buzz?'

No, CBD products are not a psychoactive agent, meaning that they do not contain the substance THC that causes this reaction. Marijuana comes from the hemp plant *Cannabis sativa* with the active ingredient THC, but CBD is a relaxant and pain-relief agent and non-psychoactive.

CBD Oil for Dogs Dosage

The doses for CBD hemp oil will vary depending on the size of your dog, and that is why a lot of the above brands give you a range of different options to choose from in terms of products. However, if you should choose to go with CBD oil or other products that have to be measured, then you should have an understanding of the dosage to give your dog.

How much CBD Oil should I give my dog?

The majority of products will have the recommended dosage on them, but it's best to start with the lowest amount possible to see how your pet reacts to the substance. Gradually increase this every 5 days until the desired effect is seen.

Vondis products are:

- THC Free
- 100% Organic
- CBD Hemp Extract -Co2 extraction
- GMP certified
- Vondis CBD Pet Oil ingredients:
- MCT Oil (Multi-chain Triglyceride)

The product is stored in a 50ml bottle containing approx. 1000 drops, with a medical dropper for easy dosage.

Important Information

Store the product in a dark, dry and cool place. Once opened, keep it refrigerated for optimal effectiveness. Vondis CBD Oil is 100% natural (organic), ethically sourced, plant-based and suitable for vegans. It has been lab tested and is GMP-certified.

TESTIMONIALS:

Katerina Bogiages My poor Champ has struggled with arthritis from as early as 4 years old. To this day (he is 11) he still will do anything to play with his ball. We tried every and any medicine that might help and eventually got him onto CBD. To this date it is the only thing that sufficiently helped him enough to a point where he can "semi-painfree" play with his ball again!!

Dylan Ross Wilkinson I have my little angel Daisy (The one on the right, her sister Zelda is next to her, never leaves her side). She was diagnosed with a very aggressive type of cancer. After a lot of research we started using cbd oil for her, topically and orally and overall it has improved her mood and seemingly slowed the growth of the tumor. So while it may not cure her fully, it is definitely making her life a lot more bearable while she is still able to fight it.

Rochelle Levitt Ruby Tuesday Levitt absolutely loves her CBD vondis cookie every morning and every night... her 14yr old staffie coat is feeling and looking so much better. Real amazing thing about the CBD biscuits is the meer fact I've not used her rather expensive eye drops since trying them out about 8weeks ago... ruby gets like a hard film over her already blind eyes which had to be lubricated and wiped out constantly... now.... no more eye drops
